

THE EMPRESS EXPRESS

VOLUME XVIII. No. 1

EMPRESS, ALTA. THURSDAY, June 5, 1930

Price: \$2.00 Per Year.

United Church

Church School, 10:30 a.m.
Public Worship, 11:30 a.m.
Subject: "Pastorale."
Services will be held at:
Leland, 2:30 p.m.
Social Photos, 7:30 p.m.
Wanted: "Parents who will not send their children to church, but who will go with them."

Rev. Geo. A. Shields,
Minister.

Castle Coombe Mission

11 a.m., Walden School.
2:30 p.m., Mayfield Hall.
3:15 p.m., Sunday School.
7 p.m., Trossley School.
— R. A. Cameron, Student
Missionary United Church.

Report of Cream Prices

For the week ending May 21, 1930, the following prices were reported: Butter, 15.00 per pound of butterfat, in several grades of cream, and at the points shown:
Jasper Dairy, special grade, 30c, No. 1 28c.
Ponoka Creamery, special grade, 28c, 25c, No. 1, 28c, 27c, No. 2, 25c, 24c.
Minimum: Special grade, 28c, 27c, No. 1, 26c, 25c, No. 2, 23c, 22c.
Prices changed May 21.

Next Week's Picture Program The Bellamy Trial

One of the largest and most talented casts ever assembled at the Metro-Goldwyn-Mayer studio, was brought together when Monta Bell filmed "The Bellamy Trial," which plays at the Empress Theatre, Friday and Saturday of next week.

Leatrice Joy, making her debut as a free lance star, finds the stellar cast of players as Sue Ives, the woman on trial, her first appearance since the making of "Blue Danube." George Barrand distinguished British and American stage star, plays opposite Miss Joy as the husband whose faith is unshaken by the murder accusation. Kenneth Thompson, another product of the legitimate stage, who was last seen as Ruth Chatterton's leading man in "The Devil's Plum Tree" is the second murder defendant, husband of the slain woman. Other characters have equally capable actors filling the roles. The play is based on the book by Frances Noyes Hart.

We are pleased to report that E. McGill is now convalescent from his recent illness. Speechless of growing crop, south-west of town, show the grain to be 9 to 12 inches high. North of town, in the heavy land the growth is not so marked.

District Weed Inspector's Report of S.-W. District

The crops in the locality, generally speaking, are well advanced and have not yet suffered from lack of moisture, except in some cases where on light land the grain has suffered from blowing. Rain will be needed soon, however, to continue growth.

Corn in gardens and in small acreages in the district is well advanced, and would indicate good yields of fodder and seed. More of this crop might be grown to the advantage of the farmers as the moisture requirement of corn is less than that required by oats, wheat or barley.

In most cases the work of summer-fallowing is well advanced, but in a few cases the growth of weeds is rapidly taking the moisture from the soil.

A slight frost was reported in the South Plains district on the morning of June 3rd. Beans were nipped in the gardens.

Attention is called to the growth of patches of Stink Weed along head lands and roadside, which if allowed to mature, will pollute clean fields. The practice of scattering straw and then burning, is more effective in the eradication of this noxious weed than mowing, raking and burning; as the latter method scatters seed which will germinate later.

Flocks of sheep on a few farms in the district, help materially in controlling weeds around the buildings and on summerfallows, besides yielding a crop of wool at this season of the year and a crop of lambs later.

Movies To Aid Food Supplies of Future Days

New York.—Research with a view to increasing the world's food supplies, hundreds of years from now when the earth has a bigger population to feed, is being aided by the moving picture camera. An elaborate motion picture plant has been established in the Boyes Thompson Institute for Plant Research at Yonkers, a suburb of this city.

At present, motion pictures are being taken of the root hairs through which plant roots absorb their nourishment from the soil, and the intention is to take pictures showing the complete action of the behaviour of the food absorbing mechanisms of plants. Since the movements of plants

Mrs. A. McCallum of Medicine Hat Passes Away

Mr. E. McGill received on Saturday the sad news of the death that day of his sister, Mrs. A. McCallum, of Medicine Hat. Owing to his poor condition of health, Mr. McGill was unable to attend the funeral service, but was represented by his wife, Mrs. McGill and Mr. and Mrs. D. McEachern. The funeral was held Tuesday. Mr. McCallum is personally known to a number of our townsmen, and sympathies are extended to him and his family and Mr. McGill in their bereavement.

Weather Is Featured By High Winds And Cloudy Weather

Weather of the past week was featured by high winds which on some lands have done damage, but this seems to apply more to individual cases than to areas. Reports are that the crop throughout the district is "as good as most and better than some." People are a little disappointed in that the district did not get any rain out of the recent cloudy weather. However, the cool weather that prevailed was of material assistance to the grain in helping it to recover from the buffeting by the winds.

R. H. Elliott, district weed inspector, stated that he was well pleased with the appearance of the grain, absence of weeds and the amount of progress that is being made with summerfallows.

are not appreciable to the naked eye, on account of their extremely small range, the cameras take the picture at a very slow rate of speed, the fastest being at the rate of one picture a minute, while others are taken at the rate of one an hour. When they are projected at the usual movie rate—16 per second—the intimate life of the plant is recorded in pictures, which apparently make the movement visible.

Encouraging the Beef Cattle Industry

The difficulty of finding a market for wheat and the decline in price has drawn attention to the advisability of greater diversification in farming. With the hope of helping the dairying and stock raising industry, increased tariffs have been set up against butter, meats and other products coming in to the country. The King Government, at Ottawa, has also made a real effort to help the beef raising industry by carrying out extensive experiments in ranching.

With the coming of the summer range, the rancher found his grazing area limited, and this necessitated a more careful use of the range, the winter feeding areas. Medicine Hat constituency was chosen as the place for this research work. Gilchrist Bros. offered their co-operation, and experiments on four fields, each of 3,740 acres are being carried out, with the hope and expectation of finding practical methods of increasing the carrying capacity of the ranges.

The deferred or rotation system of grazing is being tried out—cattle are kept off each of three fields twice in six years in order to allow a crop of grass to mature—the fourth field is grazed continuously and serves as a check on the other three fields.

A careful study is also being made of water facilities, the use of salt, the gain in weight of different classes of cattle, the nutritive value of different grasses and the use of wood preservatives for the posts used in fence construction.

Re-seeding tests on burnt over land and on abandoned farms are being worked out. The Ottawa Government is anxious to compile useful and accurate information regarding the financial importance of factors in ranching and to learn the most profitable range practices to follow.

Baseball: Empress Loses In Heavy Scoring Game To Acadia Valley Team

There was a large attendance of fans to witness the league game on the local diamond on Wednesday between Empress and Acadia Valley. Right from the commencement of the first frame the Valley batsmen pounded the ball freely and the game had progressed very far before they had reached double figures and at the same time held the locals down to a blank score. It was not until the final stages of the game that the home boys commenced scoring, and by that time the Valley had amassed a huge total.

The display given by the locals was very disappointing to fans and much jocular criticism was indulged in, however, although prone to it ourselves, it is not helpful. To achieve results at any line of sport the game has to be "the game," and taken seriously. A complete re-shuffling of the team and consistent hard practice games, with the inclusion of new blood where possible, seem the only solutions. However, practice, and the manner in which it is performed is one of the chief factors. There are opportunities for better showings in future games and no individuals, managers or otherwise, can make a team, unless each particular individual aspires to do his best.

Tuesday, June 3, was observed by some of our stores closing for the half-holiday and some remaining open. And this we are told is the age of co-operation.

A. Hankin, made a trip to Lander, on Monday.

The present Minister of Agriculture has been doing this work since 1925 and hopes that this research work will have far reaching results. Reports will soon be available.

F. W. Gershaw,
M.P. for Medicine Hat.

EMPRESS THEATRE

NEXT WEEK

• Prince of Wales to Launch Empress of Britain •

A royal compliment to Canada as much as to the Canadian Pacific, the launch of E. W. W. Beatty, chairman and president of the Canadian Pacific Railway and chairman of the Canadian Pacific Steamships, Ltd., when announcing that His Royal Highness the Prince of Wales had consented to act as sponsor of the new giant liner of the Canadian Pacific fleet, the "Empress of Britain."

"We are greatly gratified," said Mr. Beatty, to learn that His Royal Highness has promised to find time to go up to the Clyde to launch her new ship. The Prince of Wales is one of the bravest men in Europe, and I take it that he has been led to do so out of his love for this country and his keen interest in all things Canadian."

The "Empress of Britain" will be the largest ship built in Great Britain since 1914.

The ceremonial launching, at which the Prince of Wales will be the central figure, will take place at the Clyde shipyard of John Brown & Company, the builders, on June 15, which, incidentally, will be the first anniversary of the opening of largest hotel in the British Empire, the Royal York, Toronto, by the Governor-General of Canada.

The "Empress of Britain," besides being the greatest liner entering a Canadian port, will be the most palatial and up-to-date vessel afloat and, with her speed, will make possible a transatlantic crossing of five days or less between Canada and Great Britain, and will greatly shorten the journey between Europe and Canada and the Middle and Western States.

The mainmast liner will be ready to start service next summer, making regular voyages between Southampton, Cherbourg and Quebec.

Government of India Arrests Gandhi Under Law Over Century Old

Bombay, India.—Mohatma Gandhi, Nationalist leader, whose arrest in the civil disobedience campaign has been frequently predicted, was taken into custody in the village of Jalapoor.

Under the terms of a regulation more than a century old, the idol of the Hindu masses will remain in prison at the pleasure of the Government of India.

His arrest following a week of tranquility since the riots at Calcutta, Karachi and Poona, where he has been disavowed by Gandhi, had been heralded by many rumors, but finally came with a shock of surprise.

Upon his followers his effects were not immediately visible. The government, which in the face of his overt provocation, including, arrest since he first violated the salt monopoly at the village of Dandi, April 6, played a cautious waiting game. Many of his assistants were taken into custody and imprisoned after summary trials, while with regard to Gandhi, the "ray" bided his time.

Gandhi was taken to the central jail at Yeroda, a town near Poona, which is a British military stronghold and the headquarters of an army command.

Elaborate precautions were being taken by the authorities to prevent violence or attempts at rescue.

At Yeroda, Gandhi will be detained under strict guard.

Mr. Jinnah, prominent Bombay Muslim leader, issued an important statement at Sukkur on the eve of the Muslim conference. He advised "all my countrymen, particularly the Muslims" not to associate themselves with the methods, creed or policy of civil disobedience, which he characterized as unwise and impractical.

He earnestly called on all to show patience until the London conference has been held.

Could Trade With Nigeria

But Canada Is Only Shipping Flour At Present

Montreal.—Trade possibilities for Canada exist with even such remote British possessions as Nigeria on the west coast of Africa, declared J. L. Truett, a resident of Nigeria for 20 years. "The only product shipped to Nigeria by Canada at present is flour," Mr. Truett said, "but I am convinced that there are possibilities for other products." He explained that British members of the firm get one week's leave in every month. "It seems a lot, but it is simply an indication of how unhealthy the country is."

Noted Barrister Dead

Ottawa, Ont.—Eugene Lafleur, K. C., one of Canada's most distinguished barristers, died here April 30, from pneumonia. Mr. Lafleur was prominently connected with most of the largest litigations which Canada has had in recent years. He was to have acted as the Dominion's representative on the board of arbitration which is to investigate the "Im Alton" dispute with the United States.

Progress In Legislation For Return Of Natural Resources Is Being Made

Ottawa.—Legislation for the return of the natural resources of the Prairie Provinces has moved forward rapidly in the House of Commons. Following the presentation of the budget, the bills respecting Alberta and Saskatchewan, passed through the committee stage and were given second reading.

It then took up the bill providing for the transfer of the Peace River block and the railway belt in the province of British Columbia to the provincial authorities, which received "ministerial" treatment.

Most of the debate took place in connection with the Alberta bill and the transfer of the Peace River block.

The discussion centred around an amendment to the bill which was designed to give that province certain rights contained in the agreement with the province of Saskatchewan which were not embodied in the agreement with Alberta.

The Alberta agreement for a

Ramsay MacDonald Has Talk With Australia

Twelve Thousand Miles Bridged By Beam Wireless Service

London, England.—On April 30, in the cabinet room at No. 10 Downing Street the telephone rang promptly at 8.30 in the morning and Prime Minister Ramsay MacDonald, coming some papers in his usual chair at the head of the table, lifted the receiver and said: "Hello, is that you, Scullin?"

This was inaugurated the first direct beam wireless telephone service between England and Australia. The Labor Premier of Britain conferred with the Labor Premier of Australia, James Scullin, over a distance of 12,000 miles, and the talk went on for 15 minutes. The two premiers discussed Empire problems. The forthcoming cricket test match between England and Australia in England, and when they were likely to come together.

Just as the two continents lay between them, each could hear the other distinctly. Others in the cabinet room had the benefit of hearing the conversation through earphones. The whole conversation was clear throughout. Premier Scullin's voice came through the air from the other side of the world, was only a trifle fainter to the listeners here than the voice of Mr. MacDonald.

"I hope the day is not very far off when we shall have the physical distance between us by air passage too," Premier MacDonald said.

Must Take Livestock Industry Seriously

Or Canadian Farmers Will Lose Business, Says Cattle Man

Winnipeg, Man.—Canadian farmers must take their livestock industry seriously, producing as a serious industry or they will have it taken away from them, declared Col. H. A. Mullins, former member of Parliament for Marquette and one of the best-known cattle men in the Dominion here.

Just as big packing companies in the United States have undertaken to raise their own cattle, Canadian firms will be forced to do the same thing if farmers fail in this respect as they have done heretofore. In Montana, Col. Mullins said, abattoir companies are feeding 52,000 hogs and nearly 3,000 cattle.

Delegates From Canada

Montreal.—A thoroughly representative group of Canadian business men will leave for London, England, today to attend the Imperial Conference of the British Empire, starting May 26.

Leaves Large Estate

Toronto.—Estate of almost \$3,000,000 is disposed of in the will of Hon. Wallace Nesbitt, former judge of the Supreme Court of Canada, for which application for probate has been made.

Start Work On Branch Lines

C.P.R. Extending Two In Saskatchewan and One In Alberta

Winnipeg, Man.—Contracts are let and grading has been started on three additional branch lines of the Canadian Pacific Railway covering 145 miles in Saskatchewan and Alberta, it was announced. These affect the Swift Current locality, 25 miles southwest from Dunsin; the Debden locality, 15 miles south of the Prince Albert and Lake la Biche line running 60 miles west and northwest; and a branch of 30 miles direct west and south from Crossfield, a spur from the Calgary-Edmonton line.

These new sections of railroad will provide transit facilities for passengers and freight into some of the richest agricultural areas now under settlement, and will give encouragement to farmers already settled in the areas affected. With the letting of contracts men were immediately set to work at the process of grading, still further relieving the unemployment pressure.

Studying Canadian Railway Methods

Reorganization Of Their System Planned By Soviet Officials

Winnipeg, Man.—Six officials of the Soviet Republic arrived in Winnipeg to study the methods and facilities of the Canadian National Railways with a view of producing a complete reorganization of railroad practices in Russia.

"Traffic has increased to such an extent in recent years that we find ourselves unable to cope with present needs and consequently we must re-construct our whole railway system," said D. D. Salimov, Vice-Peoples' Commissioner for Ways of Communication of the Soviet Republic, who is heading the committee in its investigation. "We are particularly interested in the heavier track, the stronger motive power and the yard facilities, none of which are found in any European country."

Italy's Naval Program

Government Planning To Build Twenty New Warships

Rome, Italy.—The Italian government is planning to lay down 29 new warships this year—a total of 42—200 tons, divided into one 10,000-ton cruiser, two 5,100-ton scout cruisers, four 1,240-ton destroyers and 22 submarines.

Four of the submarines will be of 1,300 tons each, six of 81 tons, and 12 of 610 tons.

The council of ministers decided on the program after a detailed report by Admiral Siriani, who was the Italian naval expert at the London naval conference, and the press hailed the action as bringing "parity of fact."

Manitoba Seeding Nearly Done

Winnipeg, Man.—Seeding of wheat is about 80 to 85 per cent finished in Manitoba and present prospects are favorable for early sowing of the entire grain crop, according to a summary issued recently by the Manitoba department of agriculture. A large number of farmers have all their wheat sown and are proceeding with the planting of their other crops.

DEFENDS MARSHALL FOCH

Raymond Polcarve, former premier of France, has taken up the pen to defend Marshal Foch against the criticism of Clemenceau's "Grandeur and Misery of Victory."

Raymond Polcarve, former premier of France, has taken up the pen to defend Marshal Foch against the criticism of Clemenceau's "Grandeur and Misery of Victory."

Bisley Team Selected

Men Chosen To Represent Canada At Big Shoot

Ottawa, Ont.—The Canadian Bisley team has now been selected, and will sail from Canada on June 13. Col. Birdwhistell, secretary of the Dominion of Canada Rifle Association, announced the composition of the team that will represent Canada at the competitions of the National Rifle Association.

It will again defend the celebrated Koloport Cup for the short range team championship of the Empire, and the many other trophies brought to Canada by last year's team.

The team will assemble in Montreal on June 12, when they will be inspected by the Army of the British Empire. In the evening they will be tendered a farewell dinner on board the S.S. Duchess of York, and will sail the following morning.

The team will sail from Montreal and will carry with them the Koloport Cup, the grand aggregate trophy; the All-Comers Aggregate Trophy, and the Elkington Trophy, all of which were brought back by the 1929 team. The members of the team are selected from the highest scorers in the Bisley aggregate at the D.C.R.A. meeting held at Connaught Ranges last August.

Britain To Establish Flour Regulations

Minimum Percentage Of Domestic Wheat Required For Each Loaf

London, England.—The British Government has definitely decided to establish regulations requiring a minimum percentage of British wheat flour in every loaf, milled in Britain, according to the agricultural correspondent of the "Daily Express" to day. The newspaper adds the minimum will be varying not a fixed figure and that the government's policy will shortly be published in the form of a governmental "white paper."

Radio Stations To Fight Fires

Port Arthur, Ont.—To aid in forest fire stations, two radio stations will be operated from advantageous points in the Thunder Bay district this season. Communion will be established between observation towers and the chief ranger's headquarters.

AN INTERESTED SPECTATOR

Photograph shows Stanley Baldwin (left), former prime minister of Great Britain, smoking what looks like a "Dawes pipe" with the Cambridge coach, watching the Cambridge crew train at Putney, Eng., in preparation for the classic Thames boat race, which was won by the light blue of Cambridge.

Hon. Vincent Massey To Succeed Larkin As High Commissioner To England

Good Market In Orient For Apples

British Columbia Growers May Build Up Big Business

Victoria, B.C.—Plans for invading Oriental markets with British Columbia apples are being shaped by the provincial government through the marketing branch of the department of agriculture, following the receipt of advice from Hon. Herbert Marler, Canadian minister to Japan, pointing to the possibilities of this business. A large market awaits the B.C. fruit in Japan and China, Mr. Marler said, and the department is anxious to take advantage of these opportunities.

The impression made by experimental shipments from here to large markets of Hong Kong has been excellent. Mr. Marler stated, and should enable Canadian growers to sell large quantities there in the future.

The department is also anxious to promote the shipment of canned fruit and vegetables to the Orient, and Mr. Marler believes that a large business in this line can be built up. It requires of extensive advertising and is stressed. Officials of the department will confer with the fruit, vegetable and canning industries in an effort to take advantage of these possibilities in a big way.

Livestock Ranch For North

Company Interested Has Applied To Ottawa For Lease Of Land

Prince Albert, Sask.—Private interests planning to expend \$200,000 in establishing a livestock ranch north of Big River, have applied for a lease on a third of a township in the vicinity of that town. It was revealed by L. G. Patterson, Dominion lands agent here, that the area has been inspected by those behind the project and found to be ideal for livestock ranching.

Included in the livestock which is intended to raise are sheep and Angora goats. Mr. Patterson has been informed. The application for a lease has been forwarded to Ottawa. The names of those behind the scheme have not been divulged.

May Amend Foods and Drugs Act

Ottawa, Ont.—Hon. J. H. King, minister of pensions and national health, introduced a bill to amend the Food and Drugs Act in the House of Commons recently. This provides for the appointment of inspectors who are employed by the provinces or municipalities, and who are not members of the department staff to be designated "Dominion Analysts" who will be employed.

British Preference Has Been Increased Through Revisions In New Budget

Ottawa, Ont.—Hon. C. A. Dunning, in his first budget speech announced: Sales tax reduced from two to one per cent.

Downward revision of the tax brought in the last year on the sale and transfers of stock.

Duty on New Zealand butter increased one cent to four cents a pound.

Trade agreement now in operation with New Zealand will be terminated on October 12.

Trade agreement with Newfoundland to be announced soon.

Long list of tariff changes.

Increases in the general tariff on steel plate and structural steel, with duty lowered under British preference.

A countervailing duty to make Canadian tariff same as country of export on certain commodities, including certain vegetables, eggs and grain.

Exports.—An estimated surplus of \$44,507,000 for the fiscal year 1929-30 was announced by Hon. C. A. Dunning, Minister of Finance, in his budget speech.

Together with this announcement came the important statement that "numerous and complex changes in tariff rates are provided for."

Summarized briefly, the Minister said that the bill that the present budget tariff proposals involve, under the general tariff, increases in

Ottawa.—It is the intention of the government to appoint Hon. Vincent Massey as Canadian High Commissioner at London. Announcement of this effect was made by Premier Mackenzie King.

Mr. Massey will remain at Washington, where he is now Canadian Minister Plenipotentiary, until the summer vacation, probably July. He will go to London about September 1, to be in readiness for the Imperial and Economic Conference, which opens on September 30.

The post of high commissioner at London is considered the ranking position in the Canadian diplomatic service, and the promotion of Hon. Vincent Massey is a recognition of the success with which he has represented this country in Washington.

The appointment of Mr. Massey's successor at Washington probably will be made before the end of the autumn, although the government's selection probably will be made some time before that. In the transfer of diplomatic representatives from one capital to another, it is the usual custom of governments to indicate that the transition is being made before the actual transfer takes place.

"Hume Wrong," charge d'affaires at Washington, where he is now Canadian Minister Plenipotentiary, until the summer vacation, probably July. He will go to London about September 1, to be in readiness for the Imperial and Economic Conference, which opens on September 30.

Mr. Massey leaves a tribute to the distinguished way in which Mr. Massey had performed the duties as Canadian representative in Washington. He was confident Mr. Massey's intimate knowledge of United States affairs would be most helpful in serving not only Canada but British interests in London.

Mr. Massey succeeded the late Hon. Peter Larkin, who died in London recently. He was appointed to the Washington post in 1926, and took over his duties in February, 1927. He was the first Canadian minister in a foreign capital.

Amendment Was Defeated

Move For All-British Beer Voted Down In House

London, England.—The Conservatives lost their fight in the House of Commons for all-British beer. They had won amendments to the beer resolutions of the budget. One would diminish the increased beer duties proposed under the budget. The other would give a rebate on beer made from home-grown malt hops. But the chauceler of the exchequer was unyielding. He would accept neither.

Under a combined Liberal-Labor vote the first amendment faced an adverse majority of 215. The second found an adverse majority of 128.

rates on 54 items and decreases on 46; under the intermediate tariff, increases in rates on 35 items and decreases on 58; and under the British preferential tariff, increases in rates on 11 items and decreases on 270.

Under the revised tariff is completed, the Canadian customs tariff will consist of 1,188 items, of which 589 will be free under the British preference.

The changes proposed, the Minister stated, will have the effect of greatly increasing the British preference in the Canadian market.

The scene as Mr. Dunning made his statement to the House of Commons was tense with dramatic interest. On the floor of the House nearly every seat was filled. Galleries were packed.

For weeks the word had gone forth that this would be the most far-reaching budget in a decade. It was referred to as "the budget of the century."

Expect National Livestock Policy Recently Formulated Will Greatly Aid Industry

Involving the appointment of a committee of three, and federal appropriation of \$1,000,000, a national livestock policy has been formulated by the Canadian livestock co-operative organizations, following the recent all-Canada agricultural conference in Ottawa, it was announced by W. D. Mackay, president of the Canadian Livestock Co-operative.

It is proposed that the committee of three, comprising a representative of the livestock co-operatives, a representative of the federal department of agriculture and a third to be chosen by these two, have the direction of the national policy, which will involve the construction of two demonstration abattoirs, one in eastern Canada and one in the west.

Location of the western plant has not been decided yet, but there is some possibility it may be built in Regina.

The purpose of the policy is to enable producers to secure information in regard to processing, distribution and marketing, as well as production, so that not only will costs of processing be determined but also grades may be established on a proper basis for both live animals and meat products. "It is the intention," said Mr. Mackay, "to cover all phases of the industry from producer to consumer. There are serious defects in production as well as in processing, distribution and marketing."

The policy outlined is the aftermath of the Ottawa conference in March between representatives of the federal and provincial departments of agriculture and of the livestock co-operatives, when a resolution was adopted requesting the federal department, in association with the co-operatives, to investigate the reasons for the fluctuation in prices of livestock and livestock products, and endeavor to construct a policy which will stabilize prices to profitable levels, particularly with reference to selling of such products on the export markets.

"The proposal," said Mr. Mackay, "does not contemplate any interference with the livestock marketing industry, but the proposed two demonstration abattoirs will be in the nature of research laboratories. It is agreed to establish the necessary spread in prices between the live animal and the finished products, to determine the possibilities of extending the range of variety of products and to ascertain the extent to which domestic animals should be a charge on livestock production."

"These demonstration abattoirs would be an invaluable aid to the industry in solving problems which will doubtless arise as the industry develops. Rightly or wrongly, the majority of producers today believe they are paying unnecessary charges for a huge surplus of equipment, for excessive cost of equipment not being used to capacity and for out-of-date equipment."

"These are some of the reasons why the livestock industry is languishing and why it is impossible to persuade the producer to increase production to the point where it would be possible to meet the requirements of the British market for a continuous supply of uniform quality products."

"While livestock production has made progress in the past 15 years, it has made less progress than any other industry in the Dominion. In fact, Canada's exports of livestock and livestock products are rapidly approaching the vanishing point, whereas this should be one of our big sources of national revenue."

Canadian cattle exports have dropped from 291,000 head in 1925, to 162,000 head, and live hogs in the same period from 89,000 to 3,500 head. Exports of hog products have dwindled from 100,000,000 pounds in 1925, to 30,000,000 pounds in 1929.

"You haven't said why you want a divorce?"
"Because I have a husband!"
—Gustav Macchini, Milan.

W. N. U. 1339

For the same period total marketings of Canadian cattle have declined 108,000 head, and hogs, 100,000.

"The seriousness of the trend can readily be grasped when the importance of the livestock industry to agriculture and the importance of agriculture to the national welfare is considered. Because of the relationship between agriculture and industry the problem is of as great interest to the city man as the farm resident, and it affects the welfare of eastern Canada just as it does that of the west."

"Money has been expended for research and laboratory work in connection with other commodities, and it is just as imperative that similar assistance be given to the livestock industry, at present a declining national asset. If steps are not taken to put it on a parity with other industries, all industry will suffer."

"Producer present conditions the producer is afraid to increase his production. It is essential he receive some assurance that his efforts will not be met by greater losses."

CHILDISH AND COZY

All Tingey models are created and sketched in Paris and the patterns are made in New York. From long experience, mothers have learned there are few cuts more suitable and becoming to the little than those of the type pictured.

With today's pattern one could make numberless little dresses for little Elizabeth, Ann and Mary Jane, and with variation of color and material, make each model look interesting and different.

The original dress is a daintily flowered thin woolen of the childlike type, with a pale yellow with pink flowers and bindings. Plain blue gingham with white bands would be adorable; so would white dimities and spotted swiss with pale color edges. Other schemes are checked and dotted with blue and white, with contrasting edges, and wool or cotton velvets. Wash silks are also lovely for such little frocks.

This pattern may be obtained in size 2 to 6. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address: Pattern Department.

"Ship's Cook (to new helper) —
"Ever been on a ship before?"
"Helper—Sure, I was a gunner in the Navy."
"Cook—Well, start right in and aboil the peas."

Launches "Helene"

Miss Nesta Gillies, daughter of Captain James Gillies, C.B.E., general manager of the Canadian Pacific Steamships, Ltd., who launched the "Princess Helene" from the yards of Messrs. Wm. Denny & Brothers, Ltd., Dumbarton, on April 29th.

The "Princess Helene" will have a tonnage of about 4,000 and her port of registry will be Saint John, N.B. She is intended for the Canadian Pacific Fishery Service.

Who Controls Canada's Wealth

Estimates Show Largest Per Cent Of Securities Held By Canadians

All this talk about Wall Street owing Canada does not stand up before facts.

The wealth of the Dominion is between \$28,000,000,000 and \$39,000,000,000 according to the latest figures of the Dominion Bureau of Statistics. Of this sum outside capital makes up \$5,904,000,000, or not more than one-fifth of the whole. And this one-fifth is by no means all in the hands of American neighbors. More than \$2,000,000,000 of the amount belongs to the British Isles, the United States share being \$3,770,000,000.

Further, the bureau estimates that from 55 to 65 per cent. of the securities of all enterprises on Canadian soil are in Canadian hands, and that, in addition, Canadians have invested about the sum of \$1,745,815,000, of which nearly \$1,000,000,000 went to the United States.

In other words, Canada's 10,000,000 people have invested outside their own country something like 30 per cent. of the amount that represents outside investments in Canada.

Idea Might Be Useful

Ontario Town Has Use For Old Motor Cars

Never again will worn-out motor cars be discarded to the scrap heap in this locality. A new use has been found for them.

More than 150 motor relics were taken to Gressy some time ago and placed along the shore of Lake Ontario and filled with stones. The water in the lake is high at present and formerly the stones continually swept over the road, practically ruining it for traffic.

The automobile breakerwork, however, has proved successful and the road is now in first-class condition.

FORCED DOWN BY FOG

A privately chartered aeroplane bound from Montreal to New York, with Rev. Aylmer Pagnieu, rector of St. Catherine Church, and Charles Moquin and Leonard Lehan, Montreal business men, as passengers, became lost in the fog, and had to make a forced landing on the estate of Dr. C. H. Dunn, at Kalamazoo, N.Y. It was reported that the machine lost a wheel while making the landing. George Pigeon, a former war aviator, was piloting the machine. The photograph here shows the aeroplane after the landing.

Prince Will Launch Liner

Heir To Throne Is Sponsor For New C.N.R. Boat

Believed to be the first time that a great passenger liner has been sponsored by the heir to the throne, the recent announcement that the Canadian Pacific new ship will be launched by H.R.H. the Prince of Wales has been greeted with great acclaim by the press in all sections of the British Isles.

The Glasgow Herald commented editorially to the effect that it is "a matter of great satisfaction to the people of Scotland that the Prince is coming to perform this important ceremony. It is peculiarly fitting that the Empress of Britain should be christened by H.R.H. for an indissoluble link between the Clyde and the Dominion has been forged to no small extent through the efforts and example of the Prince."

A tribute is paid in the same paper to the series of fine Canadian Pacific ships that have recently been built on the Clyde.

In addition to the launching of a passenger vessel by H.R.H. being unusual, it is remarked upon that quite a departure from precedent has been made in the fact that a lady usually performs the act of sponsorship.

The last occasion upon which royally officiated at a passenger launch was when H.R.H. the Duchess of York sponsored the 20,000-ton Canadian Pacific liner that bears her name.

Predicts Speedier Motor Cars

Will Come With Better Highways, Says Sir Henry Segrave

Automotive racing cars which will travel so fast that the human eye will be unable to record their passage are mechanical eventualities—speculators on land which will outrun the swiftest aircraft that have been designed for cruising among the clouds.

That, at least, is the prediction of Sir Henry Segrave, owner and driver of the world's fastest automobile, the spectacular "Golden Arrow" which was powered to attain a maximum speed of four miles a minute and which was timed at Daytona Beach in the unparalleled velocity of 231 miles an hour.

Sir Henry Segrave maintains, says "The Scientific American" that with the eventual building of super highways in the United States, and with turbine perfecting the modern motor car, American motorists will travel at speeds from 100 to 150 miles an hour during their cross country tours with as great safety as they now journey at forty-five miles an hour. He says that at present there are ten miles of cars built in England which can do 100 miles an hour or better on present tracks and the finest roadways.

May Be Lucky

Deep in the wilds of New Jersey lives a man of seventy-eight who has never seen an automobile. Well, there are a lot of angels who might have been boasting of seventy-eight years on this earth today, were it not for the fact that they failed to see an automobile . . . a certain speeding one, at least.

Development Of Extensive Fish Industry In Hudson And James Bays Planned

Farming By Machinery

Mechanical Aids Have Followed Each Other In Quick Succession

Early in the day, on farms large and small, the inventor and manufacturer largely reported their triumphs in factories and mills. Their reaper had started a revolution on the land before the Civil War. But that crude device, which merely cut the grain and left it unbound in piles, was superseded by the automatic self-binder, and later, in the Far West, by a machine that cut, threshed and bagged wheat ready for the market all in a single operation.

In 1870 the chilled steel plow, light and durable, was available at a low cost to farmers long accustomed to the heavy, back-breaking implement of ancient menials. Swift in succession came mechanical corn planters and wheelbarrow that drove from the fields the men who dropped or sowed grain by hand. And then came the self-propelled riding plow, hay loaders, potato diggers, tractors, gas engines and other prime inventions made a change in the cultivation of the soil scarcely less profound than that wrought by the spinning jenny.

The man or woman with a hoe, bowed by the weight of centuries, now mounted a tractor and drove a furrow with the knock of a motorist. If, unlike the industrial process, the farmer worked alone in the open country, still the automobile, rural postal service, telephone, and radio now gave him quick communication with the market bank and grange.

Dairying As Side Line

Good Profit Can Be Made From Butter Sales

H. R. McMillan, in a speech before the Vancouver Board of Trade, told us that Canada imports 20 per cent. of the butter supply she uses.

The Ontario farmer (which, of course, includes the farmer's wife), didn't make Ontario the province it is today by buying butter. And that is one of the first lessons the Western farmer has to learn—that if he is to take care of the lean years and the poor markets—he must go into farming in all its branches—he must keep cows and make his own butter, he must raise his own poultry.

It used to be the proud boast of the Ontario farmer's wife that she "kept her table" with her butter and eggs. And most of them used to clothe the family, too, in the same way. Most farmers can not afford to pay cash for "cats" that should be grown on the farm. Specialized farming communities prosper during favorable seasons, but the lean years, which invariably come, usually leave a trail of disaster for the one-crop enthusiast.—Vancouver Province.

The Great Northern Plains

Area In Dominion Furnishes Pasture For Musk Ox Caribou

There is an area in Northern Canada lying between the timber-line and the tide-water of the Arctic Ocean and Hudson Bay, which includes about 500,000 square miles or nearly one-seventh of the area of the whole Dominion. Although not producing trees this area is not barren but provides pasturage, in places luxuriant, for migratory musk ox and caribou. Several exploratory expeditions have been made through portions of this area during recent years by surveyors of the Topographical Survey, Department of the Interior.

Invents Airplane Trolley

Combining the features of the airplane and the over-head trolley, Joseph Archer, a French engineer, has perfected a new electric trolley capable of a speed of 150 miles an hour. The invention will be demonstrated in Paris shortly. The car is similar to that of the airplane. It travels on a monorail. Pin-like wings projecting from the sides support much of the car's weight when in motion. It can be brought to stop within 300 feet by reversing the propeller.

Source Of Cheap Leather

Seeking to turn every part of the whale into profitable use, Norwegian whalers, with the aid of a Russian chemical engineer, have perfected a process of converting the huge animal's intestinal membrane into a tough, almost indestructible and cheap leather for gloves.

Prospect of developing an extensive fishing industry in Hudson Bay and James Bay is being considered by the Dominion Government. Some time this year the Department of Fisheries plans to send an expedition northward to find out just what fish, if any, there are in the great northern inland sea.

The completion of the Hudson Bay Railway to Churchill and the announcement of plans to push the Transatlantic and Northern Ontario Railway northward to James Bay make an investigation of the fish resources of the area important. Hitherto there has been no means of getting fish out and consequently no attempt at commercial fishing. Rail communications, however, will bring the Bay close to the great inland fish markets of the continent and provide for prompt delivery of fish to southern Ontario, the prairie provinces and the central states.

The expedition will be composed of practical fishermen accompanied by a scientist. They will sail northward in a regular fishing ship, possibly a trawler or perhaps a schooner. Owing to the fish in the great inland sea to be investigated it is felt the expedition will require at least two years to complete its work.

The fish explorers, as they may be called, will sail the bay dropping anchor here and there and catching the fish as they are available. They will observe and note the varieties of fish and the quantities in which they are found, also the condition under which the fish are available. They will have to be carried on and the type of boats required for successful commercial operations.

Although men have sailed over and lived around the bay for centuries there is no accurate knowledge of the fish to be found there. It is known that fish are plentiful in rivers emptying into the bay but no one knows whether they exist in the bay itself. The only fishing ever done in the area has been on the small scale demanded by the local Indian consumption. Consequently the only catches have been made in the rivers and in the bay about the mouths of rivers and in the neighborhood of settlements.

The department feels it is best to make investigation of the bay before attempts are made at commercial fishing. In this way they may be able to avoid loss to private individuals. But they will also determine in advance the regulations which should apply to any commercial fishing which might develop there and will avoid the difficulty of imposing regulations on fishermen who have already established their business.

To Take Canadian Census

Will Give Employment To 1500 Persons Next Year

Preparations are under way for the decennial census of Canada to be taken in 1931, giving employment to 15,000 persons. The whole country will be covered by information agents, getting statistics as to population, births, deaths, migrations, sex, nationality, age and occupations. Production in all its forms, including mines, transportation, marketing, and finance will be looked into. Altogether there are 35 main headings in census classification and 56 sub-section headings.

Ice From Desert Sands

Terrid desert sands may furnish the ice of the future, and it will be as cold as any ice made from water. The commercial possibilities of "dry ice" from carbon-dioxide wells lying beneath the arid stretches of Colorado and eastern Utah are being stressed by the United States Department of the Interior.

"You are short-lighted and don't wear glasses."
"I do, but I hate them so that I only wear them when I am asleep."
—Pages Gates, Yvonne.

WORLD HAPPENINGS BRIEFLY TOLD

There are 27 aeroplanes in use by the Canadian Government at present. Canada has spent \$63,886 in sending delegations to the International Labor convention at Geneva, since 1925.

Earl Brydges, champion dog team driver of the world, is to become a resident of Ontario and Quebec. He is taking with him the team which won the world's title at The Pasadena derby this winter.

Navigation on the Great Lakes officially opened April 28, with the arrival of the "Hamonic" and "Noronic" at Port Arthur, each 3,000 tons of package freight for Western Canada ports.

For the eleven months ending February 28, 1930, a total of 460,089 radio licenses has been issued in Canada. Ontario with 201,941 receiving sets leads Canada. Saskatchewan has 31,266; Alberta, 20,574 and British Columbia 34,426.

The vaults of the Bank of France now hold more than one-sixth of the gold reserves of the world. France stands second in this respect only to the United States. Her present reserves exceed those of Germany, Italy and Britain combined.

So far this year, there have been 29 forest fire break out in British Columbia. The extent of the conflagrations was limited, however, with resultant damage comparatively light. There were 46 outbreaks during the same period last year.

The body of Robert Bragge, poet laureate of England, was cremated at Golden Gate, where his secretary, that even the closest friends of the family were unaware of it. The poet's widow and daughter were among the few who were present. There were no flowers.

En route to Mayfair, Saskatchewan, where they have purchased land, Louis Madaen, accompanied by his family and a brother and sister, arrived at North Portal from Chicago, Mass., in a truck fitted up as a home. They are returning Canadians and made the whole trip by motor.

Industry Growing In Value
The value of the mining industry in Manitoba is strikingly shown in a report of the Manitoba Chamber of Mines, which shows expenditures for the year 1927-28-29 follows: 1927, \$1,535,615; 1928, \$4,833,185; 1929, \$12,302,926. The wages item shows expenses in 1929 to have been eleven times as great as in 1927.

NERVES WERE BAD

Could Not Sleep

Endured Years Of Hardships

Austrian Soldier Returns Home, But Is Now Italian Citizen

From the little village of Campi, near Trento, Italy, August Lorenzi, 35, departed, 15 years ago as an Austrian soldier to fight the Russians. He has just now returned after years of hardships to find himself an Italian citizen, because his village, by the fortune of war, became Italian. Lorenzi was captured by the Russians in 1914. He was sent to Benipalatin, then to Tomak, Samarra, Tumbay and Goral. He was made to cut down trees until the work broke his health.

Then he farmed out to a miller, with whom he was working at the time of the revolution in 1917. The Bolsheviks sacked the town and burned the mill. Lorenzi fled at night. He passed several years of intense misery until in 1921 he became a farm hand. It was not until the following year he was able to send a letter to his relatives in Campi. He did not then know that the war was over.

The next year, despairing of ever being able to leave Russia, he married the daughter of a farmer. In 1928 the husband was killed through the Italian ambassador at Moscow, began to exert influence to allow him to return. But the Soviet government, because he had married a Russian, withheld his passport for four years. At last they went with some slight dollars and a few articles of clothing.

Canadian Pacific Offer

Attractive Summer Tours

In your vacation anytime between May 15th and September 30th? If so, why not take one of two very interesting tours—at reduced rates—offered by the Canadian Pacific? Consider first the Eastern Tour and what it has to offer. It will enable the tourist to visit Ontario—with its famous lake resorts, Old French Canada—with its picturesque "habitations," and the Maritime Provinces—with the interesting harbor and their equally-interesting craft. The tourist may travel to these places entirely by rail, or may choose to travel some of the way over the cool waters of the Great Lakes on a great white Canadian Pacific Great Lakes Steamship.

Various Ontario resorts at the lakeside provide fishing and bathing and, in fact, all summer sports. Niagara Falls, the beauty which attracts so many people from all parts of the world, is only one of the other splendid features of this tour. One may, on this eastern excursion, visit Old Quebec, where the traveller will see the many picturesque Catholic shrines that are scattered along the banks of the Quebec country roads—the "habitations" built on the banks of the river, some drawn by oxen. In records of the old days, the French traveller, drawn up at the dock, is the latest canoe liner—a product of the American West. The French traveller, drawn up at the dock, is the latest canoe liner—a product of the American West. The French traveller, drawn up at the dock, is the latest canoe liner—a product of the American West.

Given Valuable Papers

Early English Legal Documents Dated Back 700 Years

A collection of more than 400 Early English legal documents, some of them dating back 700 years, have been presented to New York University by Judge Moses H. Grossman in the name of Frederick Brown, a retired operator and philanthropist.

Among the collection is a 12-foot-long "pipe-roll," made of a series of skins sewed together and originally kept in a metal tube. It records that a sheriff, Richard Pyle of Southampton County, collected Crown revenues in 1638 "from the Jews for protection from being defrauded from the knights," and "from the knights for license to defraud the Jews."

Recipes For This Week

(By Betty Barclay)

CREAM OF POTATO SOUP

- 4 medium potatoes.
- 2 slices onion.
- 2 strips bacon.

Wash, peel, cut in cubes and cook potatoes in enough water to cover until tender. Rub through a strainer. There should be 2 cups mashed potatoes and liquid. Add this mixture (left-over potatoes may be used) to 2 cups of this cream sauce (3 cups milk, 3 tablespoons flour, 3 tablespoons butter). Season to taste. "2 tablespoons chopped parsley before serving."

A different flavor may be obtained by adding catsup, leeks or celery instead. On cut leeks or celery in very thin slices crosswise and cook in with the potatoes.

KIDDEES DELIGHT

- 3 cups milk.
- 3 eggs.
- 4 tablespoons sugar.
- 1 teaspoon vanilla.
- 1 teaspoon salt.

Beat the eggs until very light. Add sugar, milk, vanilla and spices. Then the milk stir till the sugar is dissolved, then beat well. Serve cold.

To carry away static electricity from oil trucks, iron chains that hang to the ground are fastened to the frames.

A different flavor may be obtained by adding catsup, leeks or celery instead. On cut leeks or celery in very thin slices crosswise and cook in with the potatoes.

A different flavor may be obtained by adding catsup, leeks or celery instead. On cut leeks or celery in very thin slices crosswise and cook in with the potatoes.

Selling Its Last Secrets

Quarter Admits Public Into Sultan's Harem At Istanbul, Turkey

Once royal dispenser of terror and mystery to the mystery-loving world, the harem is now selling the last of her secrets.

By order of the Turkish Republic, the doors of the imperial harem of the Seraglio palace of the Ottoman Sultans have been thrown open. Infidels and followers of the prophet have been admitted to the harem for 25 cents the threshold whose crossing would once have cost them their lives.

For four and a half centuries, this was the most jealously guarded corner of the vast palace, and of the vast Ottoman empire. Great walls, heavy bronze gates, thousands of eunuchs without and hundreds of eunuchs within, kept inviolate the mystery of the imperial harem. Now the public may stalk through the dusky labyrinth of rooms and corridors that seem to trail on and on indefinitely, one after the other, still faintly glowing with the same brocade hangings and silken cushions, tiled walls and frescoed ceiling of the imperial days, but empty of the sultans and dowagers, the eunuchs, and thousands of slaves who lived their hidden lives within these walls.

Canadian Literature

Efforts Of Our Writers Should Receive Loyal Support

The Sherbrooke Tribune says: "Many a man will pay fifty or seventy-five cents for some trashy American magazine, because he cannot make up his mind to buy a single Canadian book. Often enough, moreover, these are the very people who on every possible occasion proclaim their patriotism and their attachment to the things of their own country. Either they are utterly ignorant, or their taste is pitifully defective. The very real efforts of our writers to endow our country with a rich literature, solid and diverse in character, deserve better treatment than this."

Keep Tab On Weight

Approximately one out of every twenty-one adults weigh themselves daily on penny weighing machines according to latest statistics on the subject. At the present time nearly 2,800,000 adults in the United States and Canada put a penny into these scales every day. It is claimed that people weigh themselves in the summer months with about three times the frequency that they do in the winter, although medical authorities contend that it is important to watch one's weight in all seasons.

Physicians have stated that a cough or a cold that lasts more than three weeks merits a general physical examination.

England obtained the pation for her early churches from missionaries from Italy.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system in its full strength and cause aches and pains. Some are harsh purgatives which cramp and grip and leave a depressed and listless effect. Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy. A purely vegetable laxative such as Carter's Little Liver Pills, gently teaches the liver, his starts to flow, the bowels move gently, the intestines are thoroughly cleaned and constipation passes away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c per box.

Important Letters Now In Dominion Archives

Canada Has Most Of Letters Signed By Sir John A. MacDonald

The first public document signed by Sir John A. MacDonald has been added to the voluminous collection of his papers gathered together by Dr. Curtis Field in the Dominion archives. It is an affidavit signed by Sir John on October 6, 1884, upon his appointment as a pillar of the Upper Canada election in Prince Edward county. He was 19 years old at the time.

With the receipt of his letters, the Dominion archives now houses most of the important letters written by the first premier of Canada. The papers are the first draft of the British North America Act, in Sir John's handwriting.

Parachute Opens Usel

Was Pronounced Successful In Test At Cartersville, Recently

An automatic parachute which opens of its own accord after a jump, was demonstrated successfully by Curtis Field by John Rungger, a professional parachutist. Rungger, his hands tied behind him, jumped from a plane at 2,000 feet. He landed safely in a tree. So pleased was Rungger with the "chute that he said he would jump from a plane at 20,000 feet. It was invented by John Ruby.

Would Rotate Building Stones

Suggesting that the various Canadian stones be used in rotation on projected Federal buildings, the Industrial Development Board of Manitoba has devised a plan to lay before the Dominion Government in which it is urged that future plans for building operations take into consideration the possibility of having various Canadian stones used in rotation, including the Manitoba Tynall stone.

One of the attractions at Canaan, France, is a woman who lives on ground glass in a glass cage.

The world produced 1,323 million barrels of crude oil in 1928.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is so light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Custom is reason asleep. For a splendid example of this all you have to do is note the reaction of pretty men when an electric is announced. There's not to reason why, there's but to do and learn the name of the candidate representing their party. Having learned the name they know how to vote intelligently.—EX.

First Aid In The Home

It is a good plan for every family to be prepared to deal with emergencies which may arise. In each home there should be available the few articles which may be used with advantage in dealing with such emergencies. It is best to keep these articles properly labelled in a separate medicine cabinet, locked and out of reach of children.

The following is a list of the articles for the first aid outfit: A first aid outfit containing sterile gauze and bandages, to be used in dressing cuts and wounds.

Aromatic Spirits of Amonio, two ounces. Give one-half teaspoonful in water in case of fainting.

Alcohol, rubbing, for use as a liniment to relieve pain in case of sprains and strains.

Carbolated vasoline, one tube. Use in the treatment of burns.

Apply freely; cover with a piece of clean cotton and hold in place with a bandage.

Oil of Cloves. A drop or two on absorbent cotton, placed in the cavity of an aching tooth.

Boric Acid. Dissolved in water, may be used as a mild antiseptic wash or for making a compress.

Syrup of Ipecac. Use one teaspoonful, followed by a drink of warm water, to cause vomiting.

A roll of absorbent cotton, a pair of scissors, a clinical thermometer, safety pins, adhesive tape, and a medicine glass can be conveniently kept in the cabinet, and will be found useful in carrying out the instructions of the physician when there is illness in the home.

The above list may seem to be very short to the person who is used to having shelves crowded with bottles. It is to be remembered that most minor illnesses do not require treatment with drugs. The most that the lay person should do while awaiting the arrival of

the doctor is limited to a few things.

A severe illness is not threatened every time a member of the family complains of not feeling well, but a sick stomach, headache, or chill may be the first warning of the onset of a severe illness.

The trained physician requires all his skill to determine the cause of his patient's symptoms and the proper treatment necessary. It is generally expensive and ineffective, if not actually dangerous, for the lay person to attempt to prescribe for himself.
